01 [user]

Customer feedback:

The dashboard is fast and easy to use, and I appreciate the clean layout.
 However, I often struggle to find historical reports because there is no advanced search option.
 Adding filters and saved searches would make the platform much more efficient.

 02 [summarizer]

Customer finds the dashboard fast and clean but requests advanced search features for historical reports.

03 [classifier]

Dashboard is fast and clean, but advanced search and filtering options are requested for historical reports.
 Classification: Feature request

04 [action]

User appreciates the dashboard's speed and layout but requests advanced search and filtering features.
 Next action: Log as enhancement request for product backlog.
